

OBJECTIVES

“farmer empowerment for increased productivity and access to market “

BENEFICIARY

The project expects to extend its impact to about 1,400 farmers in Kilolo and Kilosa within three(3) years.

- 60% are youth and
- 50% are women

LIST OF PROPOSED MAIN ACTIVITIES

- Beneficiary selection
- Inception and engagement meetings
- Cluster and farming group’s formation
- Conducting technical and entrepreneurial capacity building(training)
- monitoring and reporting on lessons learned and project progress

POTENTIAL OUTCOME TO THE TRANSFORMATION OF THE TANZANIA HORTICULTURE

- increase youth employment
- improved quality of life metrics especially food security at family level
- increased farmer’s productivity per unity area of production to reach the potential and reduce post-harvest loss after harvesting

how green integration solve financial constraints to farmers?

at first farmers fail to engage in agricultural production due to poor economic status but green integration engage one of the representative from NMB in a meeting so that to hear the issue and find a way to solve it
